

Health & Safety, Environmental and Quality Policy

Saco Cabling is committed to a sustainable future by satisfying customer expectations, protecting the environment and ensuring the health, safety and wellbeing of employees and others affected by our work.

Guiding Principles

- We identify, evaluate and develop systems to control risks to people, the environment and service quality.
- We monitor the effectiveness of our risk control systems.
- We establish annual objectives & targets aligned to the needs and expectations of interested parties.
- We engage with and train our people on key HSEQ matters.
- We keep current with legal obligations and good practice guidelines.
- We ensure our HSEQ management system remains effective through internal **audits and independent reviews**.
- We continuously look to reduce environmental impacts by:
 - improving energy efficiency and supply chain emissions.
 - preventing pollution to air, land or water
 - diverting waste streams from landfill to reduce, reuse, recycle.
 - investigating green purchasing initiatives.

We encourage all individuals & teams within the business to demonstrate these principles through their actions and suggestions to achieve **'safe systems of work, a clean environment and delighted customers'**.
